**SaaS-Based M&R Solution Affordable for Railways of Any Size**

updated 4/24/2012 7:10:00 AM ET

**OAKLAND, CA** – International Asset Systems® (IAS), the leader in cloud-based solutions for intermodal container shipping, announces that Florida East Coast Railway, LLC (FEC) has implemented IAS EquipmentRepair for its equipment maintenance and repair operations. Automating the Maintenance & Repair (M&R) process will help provide compliance with FMCSA and other regulatory agencies. FEC gains increased revenues, reduced costs, and equipment utilization.

"IAS EquipmentRepair allows FEC to view and approve estimates, provide notifications, and expedite repairs that improves accuracy and productivity," said Brian Shultz, SVP Sales & Marketing for IAS. "M&R delays lead to delays in processing repair orders and inadequate charges. Plus, you don't have an easily accessible system for compliance."

"With intermodal shipments representing 81% of our overall volumes, the success in managing our intermodal equipment at Florida East Coast Railway. IAS EquipmentRepair has helped to modernize our intermodal equipment management process. We were not required to purchase, install, or maintain the software, and the implementation was quick and easy," said the Chief Officer of FEC. "With IAS EquipmentRepair, much of the M&R process was automated, freeing up staff resources. We received great value from streamlining processes, linking the system to our accounting system, and gaining visibility into more timely container repair status."

FEC replaced a legacy system and manual processes with IAS EquipmentRepair. This change allowed for more efficient container equipment and chassis repair process, which facilitates communications and cooperation with repair providers. EquipmentRepair automates routine tasks to speed the repair cycle and improve equipment utilization.

The solution seamlessly integrates with FEC's accounting system to automate the re-billing process and quickly so invoices are sent correctly. More accurate re-billing reduces costs by cutting administrative expenses, enabling managers to review detailed equipment history, monitor variances, and escalate time-

### About IAS
