CHICAGO, May 30, 2012 -- /PRNewswire/ -- *Supply & Demand Chain Executive* Magazine, the executive's user manual for successful supply and demand chain transformation announced its 11th annual Supply & Demand Chain Executive 100 awards, highlighting "100 Great Supply Chain Projects."

Launched 11 years ago, *Supply & Demand Chain Executive* announced its first "100" list of supply chain solution providers, consultants and other organizations that were helping lead the way in transforming companies' supply and demand chains. This year, the magazine focused the criteria for its "100" feature on supply chain transformation projects that have had a significant impact on the company's going through the implementations.

"Our readers count on *Supply & Demand Chain Executive* for intelligence and decision-making information on solutions and best practices for supply chain transformation," said Barry Hochfelder, Editor of *Supply & Demand Chain Executive*. "With this year's Supply & Demand Chain Executive 100, we are featuring '100 Great Supply Chain Projects' that demonstrate the broad spectrum of opportunities for enabling excellence in the supply chain."

Through an online submission process, *Supply & Demand Chain Executive* collected information on supply chain transformation projects, including information on the objectives, scope, timeline and results of the project. The submissions were evaluated by the magazine's editorial staff primarily based on: ambitiousness/scope of the project; creative application of technologies/solutions/services used; extent of the business results/impact; and clarity of submission.

"Our goal with this year's '100' is to put the spotlight on successful and innovative transformation projects that are delivering bottom-line value to small, medium and large enterprises across the different functions that comprise the supply chain," Hochfelder added. "The projects featured in the '100' article can serve as a roadmap for supply chain executives looking for new opportunities to drive improvement in their own operations."

SDCE is proud to list these project enablers here:
