

**IAS** streamlines the rate request and maintenance process. Dynamic tables keep up-to-date rate information at your fingertips to improve service and efficiency. Let's make drayage pricing easier.

Take control of your rates – improve profitability with each move

# DISPATCH TARIFF

DispatchTariff gives full visibility and control of your drayage rates. Integrated with DispatchManager, the DispatchTariff module allows you to maintain all your tariffs, both standard and custom, within your IAS Dispatch workflow. Instantly create, view, update, or delete rates with easy-to-use fields. When combined

with DispatchTender or DispatchOptimizer, DispatchTariff takes dray decision-making to a new level of efficiency as a trusted benchmark for evaluating incoming work order quotes. DispatchTariff offers immediate benefits without the high cost associated with developing, hosting, or maintaining traditional software or in-house IT projects.

## Benefits

- Discover your most cost-effective partners for any given move
- Eliminate the administrative burden of maintaining paper-based rate books or Excel spreadsheets
- Share information quickly and easily with authorized users across your network
- Reduce tender time and costs with pre-approved tariffs for standard work order creation
- View all your rates in one simple, secure, centralized system
- Improve customer service with fast, accurate quotes
- Seamlessly interact with DispatchManager, DispatchOptimizer, and DispatchTender
- Avoid the investment and maintenance costs associated with in-house IT systems
- Keep rate information accurate and up-to-date with automated expiration dates

## A more efficient and convenient process

Picture the scene. Dispatchers holding on the phone for rate information. Workflow disrupted by the wait for partners to come back and confirm rates through fax or email. A stack of fresh sheets waiting for someone to file them in the rate binder and take out the old papers. Or Excel spreadsheets needing to be updated and circulated. Who is checking that all your dispatchers are using the latest version of the file? Traditional methods of rate management create a constant administrative headache for busy dispatch departments.

Today, the companies consistently achieving the best prices in the most efficient way are doing so with centralized, automated global rate management technology. Move beyond pouch-updated rate binders and slash the time spent chasing down rates by phone, fax, and email with simple, intuitive on-demand software that gives your whole dispatch department reliable rate information when and where they need it, within their dispatch screens. Release your team from tedious administration for more productive and rewarding activity, moving work orders faster and ensuring the very best prices for the job.

IAS provides greater visibility, control, and optimization of assets by supplying a platform for collaboration to unite the global trade, transportation, and logistics industry. IAS solutions, quickly implemented and immediately beneficial, can be operated as turnkey online solutions, completely customized, or integrated into existing transportation management systems. The web-native applications and brokerage services move clients away from costly, low-value, tactical IT challenges such as patching in new partners and implementing, upgrading and maintaining software and hardware towards the ability to focus on strategy and immediate value creation. Increasingly, every firm's success is tied inextricably to partner performance, cost management, environmental impact, and quality. The IAS platform and solution portfolio connect thousands of trading partners including leading ocean carriers, motor carriers, railroads, logistics providers, equipment lessors, repair depots, and terminals, converting the entire community's input into actionable information to enable clients to increase revenue, margin, and service.
