Simplify your dispatch workflow – everything you need, nothing you don't

IAS DISPATCH

IAS Dispatch is a centralized suite of modules used by transport order originators, such as ocean carriers, logistics providers, and beneficial cargo owners (BCOs), and by receivers, such as motor carriers and other service providers. IAS Dispatch brings together drayage assignment, appointment times, amendment management, invoicing, visibility, rates, optimization, and business intelligence – all within a single, easy-to-use workflow. IAS Dispatch supports ocean, air, LCL/LTL, international and domestic moves. IAS Dispatch coordinates your needs with the resources of partners in your global transportation network, resulting in improved profit, improved equipment utilization, and improved customer satisfaction.

The IAS Dispatch solution requires no software, no hardware, no integration and no capital expense. Get started by defining your business processes, your business rules, and your preferred partners – it's that simple. IAS will then configure the system to meet your needs. With transaction-based billing, IAS aligns its success with yours and that of your network partners.

Modules

- **DispatchManager** streamlines the transportation work order process by connecting originators to their global network of motor carriers and service providers, providing critical first and last mile visibility.
- **DispatchOptimizer** matches import and export work orders for faster cargo pick-up and delivery, fewer empty miles, better equipment utilization, and reduced transportation spend.
- **DispatchTender** unites originators and receivers with a robust, neutral negotiation platform, provides a smarter set of options, and encourages win-win collaboration.
- **DispatchTariff** keeps up-to-date rate information at your fingertips, eases the rate request and maintenance process, and reduces tender time and cost.
- **DispatchInvoice** simplifies drayage billing and payment, reduces discrepancies, and enables efficient drayage settlement.
- **DispatchInsight** demystifies the data that drives your business, provides powerful visualizations in an intuitive interface, and accelerates fact-based decision-making.

Leverage your network to improve performance

Large, disparate networks, complex data integration, effective workflow automation... sound impossible to get under control? IAS Dispatch, powered by the InterAsset platform, solves the challenges associated with managing the last mile. Communicate effortlessly within your network, easing the dispatch process from assignment to optimization to settlement. With more visibility of the supply chain, you can reduce costly inefficiencies and provide a higher level of customer service. IAS makes it easier than ever to work with your partners to achieve optimal performance.

Connecting thousands of motor carriers worldwide, IAS Dispatch is one of the largest global intermodal networks in the industry. With such a strong user community, your partners may already be connected, enabling you to begin experiencing the value of IAS applications even faster. Make connectivity your first priority and plug into an established and continually growing community.

IAS provides greater visibility, control, and optimization of assets through a collaborative platform uniting the global trade, transportation, and logistics industry. IAS solutions, quickly implemented and immediately beneficial, can be operated as standalone web-native applications or integrated into existing transportation management systems. The IAS solution portfolio and InterAsset platform create a more valuable network by converting the entire community's input into actionable information, enabling clients to interact seamlessly, optimizing the inland intermodal process, and lowering the cost of routine business transactions. IAS connects thousands of trading partners including leading ocean carriers, motor carriers, railroads, logistics providers, equipment lessors, repair depots, and terminals, and enables them to increase revenue, margin, and service. The IAS team of transportation experts is dedicated to providing world-class solutions and combines personal, 24/7 service worldwide with one of the intermodal industry's most comprehensive service level agreements.
