

IAS supplies an efficient and neutral platform to connect chassis owners and users. Reduce expenses, understand equipment usage, and enjoy a higher level of customer service. Let's make chassis provisioning convenient.

High tech and high touch – your chassis are taken care of

CHASSIS MANAGER

ChassisManager provides the chassis management solution necessitated by the new chassis-provisioning model in the United States. ChassisManager enables asset providers to easily and conveniently rent their chassis to their motor carrier partners and other potential chassis users. ChassisManager is built on the industry-proven InterAsset platform, which is known for its stability, connectivity, and ease of integration. The system has been designed from the ground up with the needs of all parties in mind, including ocean carriers, motor carriers, 3PLs and BCOs.

ChassisManager enables motor carriers to easily register, receive rental agreement approval, monitor their rented chassis fleet, view and reconcile chassis rental charges, and download information for re-billing. Additionally, the application allows quick, convenient, secure payment methods such as ACH and credit card.

Benefits

- Gain real time visibility of chassis rentals, including the time and location on- and off-hired and applicable charges
- Improve operational efficiency, including reductions in congestion, idle time, and repositioning moves
- Improve billing accuracy with pre-invoicing and simplified remediation features
- Receive highest level of customer service and 24x7 technical support by phone and email
- Access your partners with a system designed around both of your needs
- Improve communication of terms, pool information, and pricing
- Make collections painless with streamlined payment mechanisms
- Rent chassis in a safe, secure, customer-friendly manner
- Customize your interface with filters, configurable views, and advanced searches
- Save on costs of entry with no system to design, deploy or support

Improving data flow for easier reconciliation and payment

Chassis invoicing problems are prevalent. Each month chassis users receive an invoice of rentals that occurred in the last 30-60 days. They then must research to match up their own documentation with the usage reflected in the invoice, compile disputes and questions, and negotiate the discrepancies by phone, fax, and email. It is then the asset owner's turn at reconciliation. This back and forth can take several months and the inefficiencies unnecessarily drag out reconciliation and payment.

With ChassisManager, chassis users access and manage real-time information on their rental fleet and its associated charges. The negotiation and reconciliation process is simplified through a pre-invoice form that allows a chassis user to validate or question charges immediately upon closing a start/stop data pair. This visibility and validation ensures chassis users receive clean, correct invoices that they can confidently pay by ACH, credit card, or check. Overall, both chassis owners and chassis renters enjoy a streamlined process that results in fewer discrepancies and faster payments.

IAS provides greater visibility, control, and optimization of assets through a collaborative platform uniting the global trade, transportation, and logistics industry. IAS solutions, quickly implemented and immediately beneficial, can be operated as standalone web-native applications or integrated into existing transportation management systems. The IAS solution portfolio and InterAsset platform create a more valuable network by converting the entire community's input into actionable information, enabling clients to interact seamlessly, optimizing the inland intermodal process, and lowering the cost of routine business transactions. IAS connects thousands of trading partners including leading ocean carriers, motor carriers, railroads, logistics providers, equipment lessors, repair depots, and terminals, and enables them to increase revenue, margin, and service. The IAS team of transportation experts is dedicated to providing world-class solutions and combines personal, 24/7 service worldwide with one of the intermodal industry's most comprehensive service level agreements.
