

IAS simplifies drayage billing and payment. Automation reduces errors and delays and enables efficient drayage settlement. Let's end the paper-pushing.

Control drayage costs – visibility of work order through invoicing

DISPATCH INVOICE

DispatchInvoice manages the drayage invoicing process, removes the possibility that a non-compliant invoice is transmitted, and eliminates the remediation of discrepant invoices. DispatchInvoice is able to validate the invoice over the course of the dispatch and drayage process. As the assigned work progresses, the motor carrier updates actual times, milestones and requests for changes or assessorial charges. Where approval is granted, DispatchInvoice captures those in an auditable record within each dispatch work order. When the work order is complete, it becomes eligible for invoicing. In this way, the invoice reflects the agreed upon work and always transmits the correct costs, making payment easier and timely. This enables dispatch and accounting professionals to focus on value-add activities rather than the reconciliation of past transactions. DispatchInvoice works in conjunction with DispatchManager, giving you one end-to-end system for managing dispatch from origination to payment.

Benefits

- Create, send, receive, approve and reject electronic invoices and amendments, all in one system
- Minimize time-consuming paperwork and manual data entry errors
- Reduce intermodal cost discrepancies to stop overpayments, delays, and remediation
- Verify charges by tracking pick-up, delivery and completion dates/times
- Send invoices automatically to reduce manual processes and to optimize the timeliness of billings
- Be a better partner with accurate invoices and on-time payments
- Stay up-to-date with collaborative, real-time updates and amendment automation
- Track the status of invoices to avoid late payment and penalties

A cure for the invoice-auditing headache

Manual invoicing requires hours of phone calls, faxes, and emails between originator accounts payable and motor carrier accounts receivable – two parties who are removed from the dispatch work that was performed. Because accounting departments do not know what details were agreed, it can take several auditors to check the accuracy of the originator's incoming billings. The invoices can be held up by mail, clarification requests, lengthy reconciliations, negotiations, and breakdowns in communication. DispatchInvoice removes the wasted time spent listening to hold music, reviewing old emails, digging through antiquated files, analyzing endless spreadsheets, and licking stamps. With an automated system, you get to do work instead of re-work.

With DispatchInvoice, there are no more surprises: pre-validated invoices mean that you bill what is due and pay what is valid. IAS creates one truth, with an auditable record, and makes the math easy: work order = work done = invoice = payment.

IAS provides greater visibility, control, and optimization of assets through a collaborative platform uniting the global trade, transportation, and logistics industry. IAS solutions, quickly implemented and immediately beneficial, can be operated as standalone web-native applications or integrated into existing transportation management systems. The IAS platform and solution portfolio create a more valuable network by converting the entire community's input into actionable information, enabling clients to interact seamlessly, optimizing the inland intermodal process, and lowering the cost of routine business transactions. IAS connects thousands of trading partners including leading ocean carriers, motor carriers, railroads, logistics providers, equipment lessors, repair depots, and terminals, and enables them to increase revenue, margin, and service. The IAS team of transportation experts is dedicated to providing world-class solutions and combines personal, 24/7 service worldwide with one of the intermodal industry's most comprehensive service level agreements.
